To make a Japan for iron, mix shellar carnish with a sufficient quantity of ivory-back or lampblack. Other methods are the following: First—Asphaltum, one pound; melt, and then add hot balsom of copabia, and thin turpentine. Second—Grind lampblack very smooth, and add copal varnish to the proper consistence the rates of interest, and its entire productive capacity. Mr. Hunter's financial plan is, in brief that the crodit of the Government should be used instead of the specie of the few. It is estimatated that 4,500,000 sewing machines have been made in the United States. Their manufacture and sale in this country give employment to about 15,000 persons, and the capital employed is estimated to be from \$25,000,000 to \$30,000.000 000,000.

It is authoritatively stated by the proprietors of the Baldwin Locomotive Works that they will build in 1873 no less than 300 locomotives against 185 in the year 1877. The firm now employs 1,250 men, its usual complement, and the number seems not likely soon to decrease.

The Greenback party is certainly disap-pointed, as they expected to be able to materially weaken the Democratic vote. Had the Republicans had one more week before election there would have been a Simon pure Republican county ticket brought out which would have changed symebody's majorities. They you that somebody's majorities. They vow that they will never again be guilty of not put-ting a ticket in the field and win or die by it. As to the charge made that the Re-publicans and Greenbackers were in part-nership, it is false. G. B. C.
